

	QUALITY, ANTI-BRIBERY AND INFORMATION SECURITY MANAGEMENT SYSTEM POLICY – IMAGEM GEOSISTEMAS	Code: PO-GOV-27.1
		Date: 06/17/2024
		Review: 0
		Class: Public

Imagem Geosistemas, Esri's official distributor in Brazil, provides solution services through geographic intelligence, with the purpose of accelerating the transformation process in the customer's business environment, through technologies that connect data, systems and people with the power of location.

We prohibit any practice that may result in bribery. The independent action of the Compliance Officer favors Imagem Geosistemas in the search for continuous improvement of the Quality, Anti-Bribery and Information Security Management System, compliance with applicable requirements and legislation, encouraging the complaint based on good faith, evidence or a reasonable belief without fear of reprisal, applying the penalties provided by law, when appropriate.

We value the culture of privacy and Information Security essential for the execution of our activities, from the implementation of risk mitigation controls and incident handling, ensuring confidentiality, integrity and their availability to authorized persons.

We work with a leadership focused on the management and engagement of employees, with ethics, integrity and honesty, to achieve the objectives established in strategic planning and fulfill our social role, strengthening the purpose of building a sustainable future.

Our purpose in People Management is to nurture and strengthen the Company's Culture, care for and develop employees to generate results for our customers and the business, maintaining a pleasant and stimulating work environment, where everyone has satisfaction, trust, and pride of belonging.
